About Me

Aspiring Full-Stack Developer with hands-on experience in React, React Native, Node.js, and PostgreSQL. Delivered a live client website, shipped a collaborative design platform, and integrated AI into production-ready projects. Comfortable taking ownership from requirements to deployment. Seeking a junior developer or internship role where I can contribute, learn fast, and take on real challenges.

Education

FAST NUCES, Lahore **Aug 2023 – Jun 2027**
Bachelor of Science in Software Engineering
Relevant Coursework: Data Structures and Algorithms, Software Design and Architecture, Artificial Intelligence, Operating Systems, Assembly Language, Database Systems.

Experience

Frontend Developer Intern | Elevvo Pathways | linkedin.com/company/elevvopaths **Aug 2025 – Sep 2025**

- Built and optimized React.js components serving mobile and desktop users, reducing UI jank and improving cross-device responsiveness.
- Applied memoization and lazy loading to cut unnecessary re-renders, contributing to a measurably snappier experience on low-bandwidth devices.
- Participated in daily Agile standups, code reviews, and sprint retrospectives shipped iterative features on time within a cross-functional team.

Competitions & Technical Events

- **NASCON 2025** Software Engineering Competition at **FAST NUCES Islamabad.** Participated in a national-level inter-university competition, where I was evaluated on software engineering practices and problem-solving skills.
- **SOFTEC 2026** App Development Competition at **FAST NUCES Lahore**. Built and demonstrated a team-developed software solution leveraging AI tools in a competitive setting.

Projects

DesignHub | github.com/abdullahsalmandev/DesignHub

- Built a full-stack collaborative design platform (React, Node.js, PostgreSQL) with canvas-based editing, template management, Google OAuth, and Google Drive integration end-to-end from schema design to deployment.

Resolve R&D Lab | resolve.uet.edu.pk

- Independently delivered a complete client website and gathered requirements, designed the frontend architecture, and deployed a responsive site covering projects, publications, events, and collaborations.
- Integrated Google SMTP email automation, reducing manual outreach overhead for the research team.

Mitosis Classification | github.com/abdullahsalmandev/MitosisClassification

- Trained a PyTorch deep learning model to classify mitotic vs. non-mitotic cells, then exposed it via a FastAPI backend for real-time browser-based predictions.

Technical Skills

Languages: C++, Java, Python, JavaScript, SQL
Frameworks: Node.js, React.js, REST APIs, React Native, PyTorch
Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
Databases: PostgreSQL, Supabase, MySQL, SQL Server
Tools & Platforms: Git, Linux, Docker, CI/CD
AI Tools: Claude AI, GitHub Copilot, Cursor AI
